

Folding away your pop out banner requires a special technique that might take a little bit of practice, but following the simple steps below will ensure that you master it in no time! This demonstration is completed using a large horizontal pop out banner, but the technique is the same for all the pop out banners in our range.

For further guidance, there are a number of demonstration videos available online.

01. Remove any pegs from the banner and undo the velcro straps.
02. Lay the banner flat, ensuring that the surface beneath is clean.
03. Lift the banner at one end and grip the edges firmly with your thumbs pointing towards you.
04. Fold the banner over itself until it forms a 'C' shape.
05. At this point, you will find that your thumbs are pointing away from you. Change your hand position so that your thumbs are pointing towards you and the insides of your wrists are facing outwards.
06. Now push the front of the banner down, tucking it into itself, whilst bringing your hands together. You will see that three circles begin to form.
07. Collapse the three circles on top of each other.
08. Now that it is collapsed, ensure to keep hold of banner so that it doesn't pop open again. If this occurs, return to step 2.
09. Put the collapsed banner back into the carry case and put the pegs back into the designated peg pockets.
